// PROFILE

Full-stack developer (~3 years) profile oriented toward **systems, network** and **infrastructure**.
Daily user of **Linux**, **Docker** and self-hosting, I am formalizing my transition toward **DevOps / Cloud**.
Volunteer firefighter : rigor, composure and teamwork.

// SKILLS

Systems & containers	Linux (Debian, Ubuntu, Arch, Kali) · Docker · docker-compose Virtualization (ESXi, VMware, VirtualBox)
Network & security	VPN (WireGuard) · DNS · IPv4/IPv6 · Firewall / iptables · SSH · 10 GbE · iSCSI
Cloud / CI-CD / IaC	AWS · Git / GitLab · CI/CD (Kubernetes, Terraform, Ansible)
Development	Python · JavaScript / TypeScript · Node.js · Vue.js / React / Angular · PHP
Databases	PostgreSQL · MySQL · SQL Server · MongoDB

// EXPERIENCE

Freelance developer — Self-employed

2023 – Present

Savigny-le-Temple (77)

- Design and development of full-stack web applications for clients: front-end, back-end, database and deployment.
- Building PC configurations and deploying self-hosted environments and services.

Junior Full-Stack Developer — LessonSharing (Apprenticeship)

2021 – 2022

Saint-Pierre-du-Perray (91)

- Development of full-stack features, database and hosting management within a start-up.

Inventory manager — Picnic Fulfilment Center (Permanent)

2023 – 2024

Moissy-Cramayel (77)

- Rigor, quality control and problem-solving in a demanding logistics environment.

// PROJECTS & HOMELAB

Self-hosted infrastructure (Linux NAS) — Deployment of containerized services via **Docker / docker-compose** : self-hosted WireGuard VPN, multiplayer game servers, storage and network services.

Advanced home network — Segmentation, **VPN**, **DNS**, **firewall**, **SSH**, 10 GbE link and **iSCSI** storage; Linux administration and hardening.

// EDUCATION

BTS SIO (IT Services for Organizations)

2021 – 2023
