// PROFILE

Full-stack developer (~3 years) with a focus on **systems**, **networking**, and **infrastructure**.

As a daily practitioner of **Linux**, **Docker**, and self-hosting, I am formalizing my transition to **DevOps** and the **cloud**.

Volunteer firefighter: discipline, composure, and teamwork.

// SKILLS

Networking & Security	VPN (WireGuard) · DNS · IPv4/IPv6 · Firewall / Iptables · iSCSI · Reverse Proxy (Caddy)
Systems & Containers	Linux (Debian, Ubuntu, Arch, Kali) · Docker · Virtualisation (ESXi, VMware, VirtualBox)
Observability	Container monitoring (Uptime Kuma) · push notifications (ntfy) · integrity checks
Cloud / CI-CD / IaC	GitHub Actions · GitLab · Docker Orchestration · Kubernetes · Terraform · Ansible
Développement	Python · JavaScript / TypeScript · Node.js (Fastify) · React · Vue.js · PHP
Bases de données	PostgreSQL · MySQL · SQL Server · MongoDB

// EXPERIENCE

Full-Stack Developer — Freelance

2023 – Present

Savigny-le-Temple (77)

- Design and development of full-stack web applications for clients: front-end, back-end, database, and deployment.
- Assembling PC configurations and setting up self-hosted environments and services.

Junior Full-Stack Developer — LessonSharing (Work-Study Program)

2021 – 2022

Saint-Pierre-du-Perray (91)

- Full-stack feature development, database management, and hosting within a startup.

Inventory Manager — Picnic Fulfilment Center (Permanent Position)

2023 – 2024

Moissy-Cramayel (77)

- Attention to detail, quality control, and problem-solving in a demanding logistics environment.

// PROJECTS & HOMELAB

Personal portfolio (alexiswallez.fr) — Full-stack React + TypeScript website, Node.js API (Fastify) + containerized PostgreSQL (Docker), self-hosted on my NAS behind a **Caddy** reverse proxy (HTTPS with Let's Encrypt auto-certification).

Self-hosted infrastructure (Linux NAS) — About ten **containerized services** (Docker Compose) exposed over **HTTPS** on their subdomains via a single Caddy **reverse proxy**: media streaming (Jellyfin), PostgreSQL, ntfy notifications, game servers, and WireGuard **VPN**.

Monitoring & Observability — Real-time container **monitoring** (Uptime Kuma via the Docker socket), mobile notifications (ntfy), stack management (Dockge). End-to-end failure **detection**, 100% self-hosted.

Advanced Home Network — Segmentation, **DNS**, **firewall**, **SSH**, 10 GbE connectivity, and **iSCSI** storage; Linux administration and hardening.

// TRAINING

BTS in IT Services for Organizations (SIO)

2021 – 2023

SLAM Track (Software Solutions & Business Applications)

IPSSI, Paris 12th arrondissement (75) / Jacques Prévert Vocational High School, Combs-la-Ville (77)

Bac STI2D (Science and Technology of Industry and Sustainable Development)

2019 -2020

SIN Track (Information Systems & Digital Technology)

Lycée de la Mare Carrée, Moissy-Cramayel (77)

// COMMITMENT

Savigny-le-Temple Fire Station (77):

- Volunteer Firefighter · 2020 – Present
- Junior Firefighter · 2016 – 2020

// LANGUAGES & INTERESTS

Languages / Interests:

- French · Intermediate English (B1)
- Hardware & homelab · Scuba diving / freediving · CrossFit · Rugby
