// PROFILE

Full-stack developer with a focus on **systems**, **networking**, and **infrastructure**.

As a daily user of **Linux**, **Docker**, and self-hosting, I am formalizing my transition to **DevOps** and the **cloud**.

Volunteer firefighter: discipline, composure, and teamwork.

// SKILLS

Networking & Security	VPN (WireGuard) · DNS · IPv4/IPv6 · Firewall / iptables · iSCSI · Reverse Proxy (Caddy)
Systems & Containers	Linux (Debian, Ubuntu, Arch, Kali) · Docker · Virtualization (ESXi, VMware, VirtualBox)
Cloud / CI-CD / IaC	GitHub Actions · GitLab · Docker Orchestration · Kubernetes · Terraform · Ansible
Monitoring & Observability	Container monitoring (Uptime Kuma) · home-made metrics · external watchdog (UptimeRobot) · alerting (ntfy) · dead-man's-switch
Development	Python · JavaScript / TypeScript · Node.js (Fastify) · React · Vue.js · PHP
Databases	PostgreSQL · MySQL · SQL Server · MongoDB

// EXPERIENCE

Full-Stack Developer — Freelance

2023 – Present

Savigny-le-Temple (77)

- ▶ Design and development of full-stack web applications for clients: front-end, back-end, database, and deployment.
- ▶ Assembling PC configurations and setting up self-hosted environments and services.

Junior Full-Stack Developer — LessonSharing (Work-Study Program)

2021 – 2022

Saint-Pierre-du-Perray (91)

- ▶ Full-stack feature development, database management, and hosting within a startup.

Inventory Manager — Picnic Fulfilment Center (Permanent Position)

2023 – 2024

Moissy-Cramayel (77)

- ▶ Attention to detail, quality control, and problem-solving in a demanding logistics environment.

// PROJECTS & HOMELAB

Personal portfolio (alexiswallez.fr) — Full-stack React + TypeScript website, Node.js API (Fastify) + containerized PostgreSQL (Docker), self-hosted on my NAS behind a **Caddy reverse proxy** (automatic HTTPS via Let's Encrypt).

Self-hosted infrastructure (Linux NAS) — Fleet of **containerized services** (Docker Compose) exposed over **HTTPS** via a single **Caddy reverse proxy**: password manager (Vaultwarden), DNS **filtering** (AdGuard), media streaming (Jellyfin), PostgreSQL, **ntfy**, and WireGuard **VPN**.

Monitoring & home-made dashboard — Real-time container **monitoring** (Uptime Kuma), mobile alerting (ntfy), external watchdog. **Portal written** in shell + nginx, published on github.com/AWallez/homelab.

Advanced Home Network — **VLAN** segmentation, **DNS**, **firewall**, **SSH**, 10 GbE connectivity, and **iSCSI** storage; Linux administration and hardening.

Resilience / Backups — **Encrypted** restic · **deduplication** · retention: 7 days, 4 weeks, 6 months · dead-man's-switch · **RAID1** · tested **restore**.

// EDUCATION

BTS in IT Services for Organizations (SIO)

2021 – 2023

SLAM Track (Software Solutions & Business Applications)

IPSSI, Paris 12th arrondissement (75) / Jacques Prévert Vocational High School, Combs-la-Ville (77)

Bac STI2D (Science and Technology of Industry and Sustainable Development)

2019 – 2021

SIN Track (Information Systems & Digital Technology)

Lycée de la Mare Carrée, Moissy-Cramayel (77)

// VOLUNTEERING

Savigny-le-Temple Fire Station (77):

— Volunteer Firefighter · 2020 – Present

— Junior Firefighter · 2016 – 2020

// LANGUAGES & INTERESTS

Languages / Interests:

— French · Intermediate English (B1)

— Hardware & homelab · Scuba diving / freediving · CrossFit · Rugby
